

Trieu Vu Ha

Frontend Developer

My goal is to join a product-driven company as a Frontend Developer, leveraging experience in developing scalable web applications. I am eager to contribute to building high-quality user interfaces, improve system performance, and continuously grow my expertise in modern frontend technologies such as React, Next.js, and state management patterns.

PROFILE

EDUCATION

Hanoi Open University
Information technology
2021 - 2025
Graduated from Hanoi Open University.
GPA: 3.01

SKILLS

Programing Languages
JavaScript (ES6+), TypeScript

Libraries & Frameworks
ReactJS, NextJS, Redux Toolkit, TanStack Query, React Hook Form, Material UI (MUI), Tailwind CSS, Axios

Backend
Node.js, Express.js

WORK EXPERIENCE

05/08/2024 - 30/06/2026

CÔNG TY CỔ PHẦN GIẢI PHÁP CÔNG NGHỆ AFS

Front End Developer

- Developed and maintained ERP modules including **ACS** (Access Control System), **Logistic**, and **HRM** (Request Management), **Ticket**,... supporting complex business workflows and enterprise-level access control.
- Utilized **React.js**, **Next.js** and **TypeScript** as the core technologies to ensure scalability, maintainability, and modern architecture.
- Implemented **Server-Side Rendering** (SSR) to enhance overall performance and improve **SEO**.
- **Designed and developed** a responsive **admin dashboard** interface, following **UI/UX** best practices with clear layouts and intuitive navigation
- Built and maintained **reusable UI components** using MUI, including key elements like Button, Table, Autocomplete, Chip, and Input, ensuring design consistency across modules.
- Implemented and optimized **dynamic, large-scale** forms using **React Hook Form** for efficient handling of complex input data.
- Integrated and managed **RESTful APIs** for full **CRUD operations** and realtime data synchronization across modules.
- Collaborated closely with the backend team to define **data models** and **optimize API integration performance**.
- Leveraged **Tanstack Query** (ReactQuery) to handle **loading states**, **error management**, and **data caching**, **creating a clear, responsive**, and userfriendly UI experience.

- Optimized frontend performance through **lazy loading**, memoization techniques (**React.memo**, **useMemo**, **useCallback**), and efficient component rendering strategies.
- Leveraged **AI-assisted** development tools (**Claude Code**) to improve productivity, accelerate feature development, and enhance debugging efficiency.
- Configured **internationalization** (i18n) in Next.js to support **multilingual UI**, **dynamic content translation**, and **locale-based routing** across the ERP system.

Tech Stack: ReactJs, NextJs, Tailwind CSS, MUI, React Hook Form, TanStack Query, Axios, Redux Toolkit, Recharts

04/02/2024 - 21/06/2024

VNPT Cybersecurity Center

Internship Website

- Conducted research on computer networks and DevOps practices. Assisted in **developing APIs** and handling **data processing** for blog post management and recruitment systems using Node.js and Express.
- Performed **API testing** and resolved bugs based on feedback from frontend developers to **ensure reliability** and **performance**.
- **Integrated Redis** for caching and **optimizing API performance**.
- Collaborated using **Git** and **GitHub** for version control and efficient team coordination.

Tech Stack: Node.js, ExpressJS, Docker, MySQL.

PERSONAL PROJECT

03/03/2025 - 30/05/2025

Graduation Project: E-commerce Website for Tran Huy Mobile Mobile Device Store

- **Project description:** This is an online sales website for Tran Huy Mobile store, a mobile device store. The website allows users to register, log in to buy products online. Users can search for products, filter by price, brand and view detailed product versions including images, prices. Customers can add items to cart, place orders. The website also integrates online payment. The system includes features for inventory management, order tracking, warranty processing and sales reporting. Administrators can manage products, categories, brands, customers, employees and view sales and import statistics.

+ Frontend: <https://github.com/HaTrieuVu/Graduation-Project-Frontend>

+ Backend: <https://github.com/HaTrieuVu/Graduation-Project-Backend>

Tech Stack: ReactJs, Tailwind CSS, NodeJs, ExpressJs, JWT, MySQL.

02/06/2024 - 05/07/2024

E-commerce website

- **Project description:** This is an online e-commerce website. The website allows users to search for the item they want to buy without having to go

to the store. Users can search and filter by category that the website has. Users can add the items they want to buy into the shopping cart.

- **Github:** <https://github.com/HaTrieuVu/e-commerce-ui>
- **Link demo:** <https://e-commerce-ui-eosin.vercel.app/>

Tech Stack: ReactJs, Tailwind CSS.

01/05/2024 - 20/05/2024

Online movie website

- **Project description:** This is a website to watch free online movies. Users just need to log in to the website to search for their favorite movie to watch. Users can also filter movies based on their favorite genres.

- **Github:** <https://github.com/HaTrieuVu/movie-web>
- **Link demo:** <https://movie-web-kappa-peach.vercel.app/>

Tech Stack: ReactJs, Scss, Redux

TECHNICAL SKILLS

Frontend

React.js, Next.js, JavaScript (ES6+), TypeScript

State Management

Redux Toolkit, Zustand

UI Frameworks

Material UI, Tailwind CSS

AI-Assisted Development

Claude Code

API & Forms

Axios, RESTful APIs, React Hook Form

Development Tools

Git, GitHub, Postman, VS Code
